

# jQuery Effect

[Home](#) > [jQuery](#) > Effect

## hide() & show()

---

With jQuery, you can hide and show HTML elements with the `hide()` and `show()` methods:

```
$("#hide").click(function(){
    $("p").hide();
});

$("#show").click(function(){
    $("p").show();
});
```

javascript

### with speed

The optional speed parameter specifies the speed of the hiding/showing, and can take the following values: "slow", "fast", or milliseconds.

```
$("#button").click(function(){
    $("p").hide(1000);
});
```

## toggle()

---

With jQuery, you can toggle between the `hide()` and `show()` methods with the `toggle()` method.

Shown elements are hidden and hidden elements are shown:

```
$("#button").click(function(){
    $("p").toggle();
});
```

javascript

# fadeIn() & fadeOut()

---

You can fade in and fade out a selected item.

```
$("#fadeIn").click(function(){
    $("p").fadeIn();
});

$("#fadeOut").click(function(){
    $("p").fadeOut();
});
```
