

# jQuery Effect

[Home](#) > [jQuery](#) > Effect

## hide() & show()

---

With jQuery, you can hide and show HTML elements with the `hide()` and `show()` methods: `` javascript  
\$("#hide").click(function(){ \$("p").hide(); });

\$("#show").click(function(){ \$("p").show(); }); ``

### with speed

The optional speed parameter specifies the speed of the hiding/showing, and can take the following values: "slow", "fast", or milliseconds.

```
$("#button").click(function(){  
    $("p").hide(1000);  
});
```

javascript

## toggle()

---

With jQuery, you can toggle between the `hide()` and `show()` methods with the `toggle()` method.

Shown elements are hidden and hidden elements are shown:

```
javascript $("#button").click(function(){ $("p").toggle(); });
```

## fadeIn() & fadeOut()

---

You can fade in and fade out a selected item.

```
$("#fadeIn").click(function(){  
    $("p").fadeIn();  
});
```

javascript

```
$("#fadeOut").click(function(){  
    $("p").fadeOut();  
});
```
